

Passport Activity Newsletter

Summer 2023

Welcome to the **Summer edition** of our Rotherham CU Passport Activity Newsletter. We'll be publishing a CU Passport Activity Newsletter just before each school holiday, packed full of fun activities and ideas to keep you busy – in this version, you can find cookery, science, arts and crafts, dance and drama, circus skills, trails and hunts, multi-sports and lots more!

In our newsletters, you'll find activities taking place across the town in the school holidays – and if your child has a Passport to Learning, they'll be able to earn CU credits for taking part in all of them! Ask in school if your child doesn't yet have a Passport to Learning. Some of the activities are FREE while some will need to be paid for, and some require booking in advance. We would always recommend contacting the Learning Destination (approved activity provider) before making a special journey to join them, and you can find contact details of ALL of our Learning Destinations here: www.childrensuniversity.co.uk

During 2020 and 2021, our friends at Sheffield CU published daily CU Home Learning Challenges and reached **98** of them by the end of the school year! You can find them and more here:

<https://bit.ly/SCUHomeLearningChallenges1-98> <https://bit.ly/SCUWeeklyEssentialSkillsChallenges> We'll be sharing a selection of them in these newsletters, so why not have a go at completing them at home? You'll need to take your work into your school to show the staff, and why not tell them about all the things you learned, and how you developed a range of skills by completing the challenges? They'll give you an activity stamp code so you can enter it onto CU Online and claim your CU credits towards your next award.

If you see challenges published by other CUs, then do feel free to complete them too. To claim your CU credits for these, you'll need to show your work to your teacher in school, then they'll be able to give you your CU activity stamp code to add to CU Online.

You can find Learning Destinations in Rotherham and beyond at www.childrensuniversity.co.uk/activity-search or see our latest list at the end of the newsletter, as well as in Sheffield and Doncaster too, so why not visit some of them and collect EVEN MORE CU credits in your Passport to Learning? We're welcoming new Learning Destinations to Rotherham all the time – see details later in the newsletter, on how you can nominate an activity provider to join us! Make sure you're following us on Twitter for our Rotherham CU news!

Did you know?

The Passport to Learning is your key to exciting learning activities in and beyond Rotherham!

Looking for a new activity to try? Want some ideas for things to do nearby? Are you having a trip out somewhere? Going on holiday? Visiting friends and family? You can collect CU credits at museums, castles, forests, coastlines, mountains, cathedrals, zoos and lots of other famous landmarks in Rotherham and right across the UK.

1. Get ready!

- **Get a Passport to Learning.** Ask in school how you can do this.
- **Visit the website:** www.childrensuniversity.co.uk/activity-search

2. Get in on the action!

- **Use the website to find details of Learning Destinations** before you go. Why not refresh your search whilst you're out and about?
- **Visit them and learn lots!** Look out for structured learning activities such as trails, talks by experts, quizzes and workshops (remember: **only** these structured activities count towards CU credits).

3. Get your CU credits!

- **Collect your CU Activity Stamp.** Ask a member of staff at the Learning Destination for the code. Record it in your CU Passport to Learning.
- **Claim your CU credits.** Log into CU Online, enter your Activity Stamp Code and see your credits increase. Why not review the activity (tell us what you learned and what you thought about it), and we'll award some extra credits! Ask in school if you need any help.

Home Learning Challenges!

 Sheffield CU published 98 Home Learning Challenges during the summer last year – everything from making sock puppets to mini Olympics, and curating your own museum to making slime!

Find them all here:

<https://bit.ly/SCUHomeLearningChallenges1-98>

They published 5-part collections of challenges themed around the seven continents of the world!

Find them all here: <https://bit.ly/CUContinentsChallenges>

 They published collections of Home Learning Challenges for the school holidays. Find them here:

Christmas holidays:

<https://bit.ly/SCUWinterHomeLearningChallenge2020>

February holidays:

<https://bit.ly/SCUFeb2021HomeLearningChallenge>

Easter holidays:

<https://bit.ly/SCUEaster2021HomeLearningChallenge>

Spring holidays: <https://bit.ly/SCUSpring2021HomeLearningChallenge>

They have published a series of Home Learning Challenges focusing on essential life skills we believe every child and young person should be developing. These continue to be published on their social media channels on a Monday and Friday during Term Time in 2020/21.

Find them here: <https://bit.ly/SCUWeeklyEssentialSkillsChallenges>

 To claim your CU credits, you'll need to show evidence of your learning to a member of staff in your school, so they can give you a CU Activity Stamp Code in your Passport to Learning. You can claim your credit using the code on CU Online.

Challenge: Be a Bug!

You will need:
- Bug bingo cards (on next page)
- Other people to play with

Here's a fun game to get you developing and testing your listening skills. Can you listen carefully for the instructions and then follow them quickly? Will you be able to become a bug faster than your friends? Will you be able to listen to the instructions, even if they are whispered? Will you be able to listen carefully then remember more than one bug in a row? Ready? Let's get going...

Step 1: Gather a small group of players. Ask an adult to help you play – they will be the 'Bug Caller'. You'll need a space to play in, where you can run around and maybe even crawl on the floor!

Step 2: Give your Bug Caller the list and pictures of bugs (from the next page). Can you add any more to the list? The Bug Caller might want to cut up the pictures into cards. Have a look at the bugs and make sure all the players know how to 'be a bug' (move like one) if that bug's card is called out.

Step 3: Now it's time to play. Your Bug Caller chooses one of the bugs and calls out the instruction, 'e.g. 'flutter like a butterfly'. All the players must listen really carefully and as soon as they hear the instruction, they must act like that bug as fast as they can.

Step 4: Once you've had a few practice turns, start to play the game. The last player to 'Be a Bug' is out and must join the Bug Caller. Be careful – the Bug Caller might try and make things a little more challenging by whispering the name of the bug – make sure you listen really carefully! The last player remaining is the winner!

Step 5: Once you're all really good Be a Bug players, you could try making the game a bit more difficult. Why not ask the Bug Caller to call out the names of two or even three bugs at the same time – each player must remember the names of all the bugs and act them out in the correct order! How many bugs can you remember all together? This is really testing your listening skills! Can you swap round so each player has a turn at being the Bug Caller? Make sure you speak clearly so all the players can listen to your instructions.

You can collect **1 CU credit** for completing this task. To claim your credit, show evidence of your learning to your teacher in school. They'll give you your CU Online Activity Stamp Code and you can enter this onto CU Online to claim your credit. If you need more help, ask in school! We can't wait to see your work!

Challenge: Disappearing Egg Shell!

Investigating is a great way to find out more about a subject. Scientists investigate all the time – why does something happen? How does it happen? What affects how fast or slow the change happens? It's good to ask questions as this will help you learn more. It's also good to try and think of the answer beforehand – try and come up with an explanation if you can, or make a prediction about what might happen and why. This makes a great science experiment, so here's a challenge to get you thinking (and speaking) like a scientist – the Great Disappearing Egg Shell Experiment! You could record your predictions as well as your observations. Ask an adult to help you – they could be your assistant!

Step 1: Take your egg and gently put it in a glass jar so the shell doesn't crack, then put some white vinegar in the jar until the egg is covered (prediction 1: will your egg float or sink? Talk to your adult about why you think this. What did they predict? Who was right?)

You will need:

- An egg
- White vinegar
- Glass jar
- Pencil and paper (optional)

Step 2: Leave your egg in the glass for a while (prediction 2: What do you think will happen?) Keep watching the egg and you should start to see tiny bubbles forming on the egg's shell. (Did you guess this would happen?) This is due to the release of CO₂ (carbon dioxide). This is similar to that chemical reaction which happens when you open a bottle or can of fizzy drink.

Step 3: Put the lid on the jar and keep it somewhere safe for 7 days. Keep checking on your egg and recording the changes you can see (prediction 3: what do you think will happen? What did your adult think would happen?) Something called 'osmosis' takes place making the egg start to swell and you should see the colour of the eggshell fades from brown. A scummy layer is formed on the surface and it is good to change the vinegar solution when you see this happening (but don't worry if you don't – it will still work)

Step 4: It's time to empty the vinegar from the jar and take the egg out. Wash off any remaining eggshell. You should be able to see the egg without eggshell. It should now be soft like a sponge and light in weight and it's probably swollen a little too. If the remaining eggshell is hard to remove, just add some fresh vinegar and wait a few more days. The soft egg should now feel rubbery to touch and you should be able to see through the egg which still contains the yolk. Why do you think this happened? Does your adult know why?

Step 5: The acid reacts with the shell and "eats" away at it. The shell is made up of calcium carbonate and this gets dissolved by the acid (vinegar). The egg also swells up, because some of the liquid seeps inside. Clever eh? Prediction 4: What do you think would happen if you added food colouring to the vinegar? Why not give it a try?

You can collect **1 CU credit** for completing this task. To claim your credit, show evidence of your learning to your teacher in school. They'll give you your CU Online Activity Stamp Code and you can enter this onto CU Online to claim your credit. If you need more help, ask in school! We can't wait to see your work!

Challenge: I'm Unique!

Did you know, everyone has fingerprints that are different? There is no-one else who has the same fingerprints as you – even if you are a twin! Being different to everyone else is called being 'unique' and isn't that great? It would be really boring if everyone was the same – had the same interests, talents, personalities. So, here's a challenge to help you to think about why you are unique. What makes you different from everyone else? What is special about YOU? You'll also be able to have a really good look at your own fingerprint and create a beautiful piece of artwork which represents YOU!

You will need:

- two pieces of paper
- paint or felt tip pen
- pencil and colouring pens

Step 1: Ask an adult to help you find everything you need. Then, either apply a thin-ish cover of paint or felt tip pen to your thumb or a finger, and quickly print it onto some plain paper. Keep printing your thumb or finger (without adding any more paint) until all the paint has been used up.

Step 2: Let the prints dry then take a closer look. Find the print which shows up your fingerprint pattern the best – you should be able to see lots of wavy lines.

Step 3: Now take a plain piece of paper and copy the main lines of your fingerprint. Look really closely and draw faint lines to begin with. Look for loops and arches, straight and curvy lines. Once you've drawn the main lines, take another close look at your fingerprint and fill in the remaining lines but make sure you leave spaces between the lines that are big enough for you to write in.

Step 4: Once you've drawn the lines, it's time to start thinking about what makes you unique. What is special about you? How might your best friend describe you? It might be that you're kind, helpful, friendly? You might be a talented artist, dancer, or footballer. You might be really helpful at home or someone who makes people laugh. Start writing these things along the lines of your fingerprint.

Step 5: Once you've finished writing about your unique qualities, grab some colouring pencils and start colouring your fingerprint. Maybe a different colour for each line? It's your fingerprint so the design is up to you!

Step 6: If you need to make your writing stand out from the colours, why not go over the words with a black colouring pencil or pen? Make sure you show your artwork to an adult. You could talk about why you chose to write the things you did. What might you write if you were describing your adult, brother, sister, or friend?

You can collect **1 CU credit** for completing this task. To claim your credit, show evidence of your learning to your teacher in school. They'll give you your CU Online Activity Stamp Code and you can enter this onto CU Online to claim your credit. If you need more help, ask in school! We can't wait to see your work!

Challenge: No bake bakes!

This recipe has to be one of our favourites and it's REALLY easy. In fact, you don't even need to bake the ingredients! It's all about the science of melting and cooling – see how the changes happen to the ingredients, from solids into liquids and back into solids again...then the best bit...getting to eat them! The other great thing about this recipe is that you can make some really simple changes to the ingredients to make them into favourites for your friends or family too! You might need an adult to help you with this. Ready to get creative? Let's go...

You will need:

- 110g butter
- 2 tbsp cocoa powder/drinking chocolate
- 110g sugar
- 1 egg, beaten
- 110g mixed dried fruit (raisins, cherries)
- 200g crushed biscuits (Rich Tea, digestives)
- 185g chocolate, melted, to cover

Step 1: Melt the butter in a saucepan with the sugar, cocoa powder and the beaten egg. Keep stirring until the mixture begins to thicken.

Step 2: Add the crushed biscuits (make sure you have some larger chunks in there). HINT: an easy way to crush your biscuits is to pop them unbroken in a sealable sandwich bag then bash away with a rolling pin! Here's your first chance to get creative – choose your ingredients! We tried dried fruit (such as raisins and cherries), but if your favourite is chocolate chips, or dried apricots, or nuts, why not add them instead? Whatever you add in, mix well.

Step 3: Press your mixture firmly into a tin which is lined with greaseproof paper. Place in the fridge to set.

Step 4: Once your mixture has set (gone hard), ask an adult to help you melt the chocolate in a bowl over a pan of boiling water. The steam will create the heat to melt the chocolate. Two 'science bits' in one: turning water (liquid) into steam (gas), and turning chocolate (solid) into a liquid (melted chocolate)! Once the chocolate has melted, pour it carefully over your cooled mixture and pop it straight back in the fridge to cool again (back into a solid!). Explain this to your adult.

Step 5: Once it's cooled, remove your bake from the fridge and cut into pieces and serve. Keep it chilled for best results!

Step 6: Try changing the ingredients a little and try again! Let us know your favourite. For more recipes like this, visit www.traybakesandmore.com

You can collect **1 CU credit** for completing this task. To claim your credit, show evidence of your learning to your teacher in school. They'll give you your CU Online Activity Stamp Code and you can enter this onto CU Online to claim your credit. If you need more help, ask in school! We can't wait to see your work!

Challenge: Seed Paper!

Here's a challenge based on the idea from our friends at Kent CU! Seed paper is simple - paper with seeds embedded into it. When this paper is placed in soil and watered, it will germinate and begin sprouting seedlings. Eventually the paper will decompose and leave the seedlings to grow into mature plants. It's simple to make, a great way to recycle, and can even be used as invitations, birthday cards, or other crafts with a gardening or flower theme. So, roll up your sleeves and get ready to make seed paper!

You will need:

- White paper (newspapers, receipts, junk mail, anything that's not glossy)
- Seeds
- Hand blender
- Cling film or greaseproof paper
- Cookie cutters (optional)
- Something to cover the table with!

Step 1: Tear your paper into small pieces and soak in hot water for 10-15 minutes. Then blend the water and paper mixture until you reach a pulpy consistency. Squeeze the mixture gently and remove as much water as you can.

Step 2: Then you can add your seeds. Give the mixture a good stir round with your hands or a spoon so the seeds are well-mixed. You could even add in some dried flower petals or maybe some dried herbs?

Step 3: Lay out a piece of cling film or baking paper onto a flat, covered surface and pour out your paper mixture.

Step 4: Gently spread it out as thin as you can (this will help it to dry faster!). If you want your seed paper to be in shapes, now is the time to use cookie cutters to cut out the shapes you wish.

Step 5: Leave your seed paper somewhere warm to dry. You can gently blow it with a hairdryer on a cool setting to speed up the drying process.

Step 6: How will you use your seed paper? Create plantable gift tags, cards? You can even write on the paper, so why not write about your memories of someone you love or someone you miss, then plant the paper and watch it grow into your beautiful memories!

You can collect **1 CU credit** for completing this task. To claim your credit, show evidence of your learning to your teacher in school. They'll give you your CU Online Activity Stamp Code and you can enter this onto CU Online to claim your credit. If you need more help, ask in school! We can't wait to see your work!

Challenge: Fabulous Fundraiser

Raising funds for a special cause is a great way to use your skills to help others. Perhaps you might want to raise funds for a local charity? Maybe there's a national charity which is special to you? There are LOADS of ways you could be a fundraiser...either by yourself or as part of a group. Here's some steps to help you get going and remember to send us a copy of the second page so we can award your CU credits. Perhaps you could take part in an organised sponsored activity? Maybe you could organise a whole fundraising event?

Step 1: Decide which charity, organisation or cause you'd like to raise funds for. Can you find out information about who they are and what they do to support others? How might they use the money you raise?

Step 2: Ask an adult to help you plan and deliver your fundraiser activity, or join an existing fundraising event. Will this be a one-off event or activity, or something which takes place over a longer period? What type of activity will you do? A sponsored walk, jog, run, cycle? A fundraising party? Bucket collections at events? Ask your adult to check any important things, such as signing up to an event, asking permission to collect money at events, etc.

Step 3: Time to get planning! Where and when will the fundraising take place? How will you be involved? Which adult will be responsible for collecting and paying in the money raised? How will you tell people about your fundraising, and encourage them to get involved? Have a great time...fundraising can be LOTS of fun!

Step 4: Complete your fundraising challenge! It might not be easy, so try and think about all the money you're raising when it's most difficult. Remember to take photos – we'd love to see them!

Step 5: Time to collect in the cash. Ask an adult to help you with this. Then ask them to pay it into the charity or organisation safely. Well done you!

Step 6: Remember to claim your CU credits by showing a copy of your Fundraising Record (on the next page) to your teacher in school. They'll give you the CU Online activity code to claim your credits. You can earn **2 CU Credits** each time you complete this challenge.

Large inflatable Aquafun

Come and try 'The Beast' a 15m obstacle course. Please note the inflatable is in deep water so those using it must be a competent swimmer and able to swim at least two lengths.

Dates/time: Every Monday from 24 July to 21 August, 1.30pm to 3.00pm.

Dates/time: Every Wednesday from 26 July to 30 August, 1.30pm to 3.00pm.

Dates/time: Every Saturday 29 July to 2 September, 2.00pm to 3.30pm.

Pool closes at 1.15pm Mondays and Wednesdays for set up and will re-open at 3.30pm. Saturdays see regular timetable. Payments taken 30 mins prior to session start.

Cost: Adults £4.80, juniors £4.30, family £13.00 and under 5s FREE!

Junior membership -

£19 per month

includes gym, swim and aquafun.

15 year olds can now use the gym at anytime. T&C's apply.

Junior Gym

Supervised gym session providing a safe and effective fitness and toning workout for 11 to 14 yrs.

Dates: Every Monday to Friday

Time: 4pm to 5pm.

Cost: £4.05 per session.

Table Tennis

Two tables available at varying times. Includes bats and balls. Open to all ages, junior to adult. Bookable in advance.

Cost: £4.30 for one hour hire.

Enquire at reception for availability.

7-FOR-1 swimming offer

Aged 5-15 years old? Then try our 7-FOR-1 swimming promotion, running throughout the holidays. Just pay £3.30 for one swim and swim for FREE the following six days! Contact reception for more information, including T&Cs.

Café and FREE soft play area

Enjoy a great selection of hot and cold drinks and snacks seven days a week, including our popular kids' Slush drinks!

To avoid disappointment, booking is recommended. See overleaf for details. Programme may be subject to change.

Please note: Age/height restrictions may apply to some activities. Summer swimming lesson break Friday 25 to Thursday 31 August. Mondays, 12.15pm to 1pm and Tuesdays, 9.15am to 10am deep end closed for Aquajog. Wednesdays, 9.15am to 10am shallow end closed for Aquacise.

GRIMM & CO

• APOTHECARY TO THE MAGICAL •

Flash Fiction!

Spend two mornings working with Grimm & Co to create some fantastic flash fiction. Explore genres, different characters and how to say a lot in just a few words. A great program for young people looking to explore their author's voice and learn some tips and tricks for short story writing. If you have any questions about the programme or if your young person has any access or dietary requirements, please get in touch with us, drinks and biscuits will be provided.

Age 12-16

15th & 16th August, 10am-12pm

Location- Central Rotherham (location to be emailed out to attendees)

Magical Menu

Ever wondered what magical beings like to eat for lunch? Ever designed a menu for a ravenous dragon or hungry hydra? If you've ever wanted to work behind the scenes in the thrilling (and sometimes dangerous) career of magical catering, now is your chance!

Join Grimm & Co over two mornings to design your own magical menu and open a brand-new magical restaurant for magical beings!

Ages 7-11

8th & 10th August 2023, 10am till 12am

Location- Central Rotherham (location to be emailed out to attendees)

Nominate a Learning Destination!

Do you know an activity provider who'd make a GREAT Learning Destination?

Nominate them today:

<https://bit.ly/CUNominateaLearningDestination>

it's FREE for them to join!

there's loads of benefits on offer!

We'll contact them with more info, and invite them to join Rotherham Children's University. Once they're validated, you and your friends will be able to earn CU credits at their activities, if you have a CU Passport to Learning

for more info, contact h.oades@shu.ac.uk

WHY NOT PRINT THIS PAGE, CUT OUT THE SLIPS AND TAKE THEM ALONG TO ACTIVITY PROVIDERS TO INVITE THEM TO JOIN ROTHERHAM CU?

You're invited!

I am a member of Rotherham Children's University (CU) and I'd LOVE it if this club/group joined in too!

I earn CU credits for choosing to take part in high quality, learning activities in my own time. These credits lead to 30 different awards, as well as them helping to build my confidence, motivation, and self-esteem, develop skills, make new friends and have fun. Ask me to tell you about it!

It would be AMAZING if children were able to collect CU credits for taking part in activities here too, but we can't until this organisation is registered. It's FREE for you to join, and a really quick and easy process. Just add a few details on the link below and the CU Team will be in touch: www.childrensuniversity.co.uk/get-involved/learning-providers/ Once registered, you don't have loads of paperwork to fill in plus it might even bring in more members to our group. There's lots of benefits for you as well - free publicity is just one of them!

Contact Helen Oades (h.oades@shu.ac.uk or 07760 116874) for more info. I hope you'll be able to join soon so I can earn more CU awards!
