Giacomo Burattini

Giacomo Burattini is an artist from central Italy, who started dabbling in hyperrealism art 2 years ago when he came across this art style in a report on the daily news.

From that moment he started drawing! Giacomo works as a software development engineer but in his spare time he devotes many hours and days to creating artwork.

Displaying his work on the social media formats like Tumblr and Instagram has given Giacomo an alley to demonstrate his talent. He is dedicated to the most minute details in his artworks which sometimes can take many, many hours to get just right. He is a perfectionist at heart and hence his works of art show the painstaking perfect lines and gradations of pencil and charcoal.
